Pandemic Preparedness

The World Health Organization (WHO) has recently raised its level of Influenza Pandemic Alert to Phase 6 - the Pandemic Phase.

Zapper recognizes that our business plays a critical role in supporting the clients' day-to-day operations.

Leveraging on the experience we learnt during the last Avian Influenza, we have since reviewed, updated our Pandemic Readiness & Response Plan and conducted some preliminary drills.

We have taken into consideration the potential operation interruption scenarios, including staff infection, quarantine, etc; and taken measures to ensure the continuation of our operations.

Zapper is monitoring the local pandemic developments in various countries of our operations. We will activate our Pandemic Readiness & Response Plan swiftly and inform our affected clients, should the need arise in the respective countries.

Thank you.

The Zapper Team
